About me

As a PHP Laravel developer with 1.5 years of experience, I specialize in crafting dynamic, scalable web applications. With expertise in developing Content Management Systems (CMS), Customer Relationship Management (CRM) platforms, Social Networking Sites (SNS), and portfolio builders, I deliver high-performance, user-friendly solutions. Proficient in modern web development practices, I'm dedicated to innovative project execution. My tenure at Design Zeros has been instrumental, where I've not only expanded my skill set but also mentored junior developers, fostering a collaborative and growth-oriented environment.
